

# iWish App System Tree

This App was made by David, who was born on November 3rd, 1982, and died on January 23rd, 1984, to send his love to his Mommy and Daddy. Imagine... your are about to leave this world.

Your loved ones can be healed by the words you leave in advance. Please, leave a message for them now.

Of course, you can send messages today, but that's not all. Even after you're gone, you can send memories, messages of gratitude, apologies, schedule celebration messages and leave videos for ceremonies to show your love even after you're gone.

With hopes of healing and helping, even if only slightly, those suffering from and fighting against the COVID-19 virus - This is why we created this app.

Please send heartwarming messages to everyone important to you.

iWish is a door of hope that connects you and your loved ones.

This App is free with 8GB storage.

(about 1 hour of videos)

Please share this app with your family, friends and someone important to you.

Our wish is for people around the world to be touched with compassion

Team iWish
